## **1      Background**

### **1.1    Introduction**

Cochrane Eyes and Vision (CEV) shares the vision of all Cochrane contributors, which is “a world of improved health where decisions about health and health care are informed by high-quality, relevant and up-to-date synthesized research evidence”. Cochrane views its mission as “responsibility to promote evidence-informed health decision-making by producing high-quality, relevant, accessible systematic reviews and other synthesized research evidence.” In many ways, Cochrane is a virtual organization due to its international membership. It comprises a Central Executive Office, which handles administrative tasks; a Central Editorial Unit, which is responsible for production and quality of the Cochrane Library; Centers, the voice of Cochrane within the respective countries who build partnerships with other organizations and provide training; Cochrane Review Groups (CRGs), which perform systematic reviews; Cochrane Fields, which promote the production of systematic reviews within broad areas that cross the focused areas of Cochrane Groups; Methods Groups, which develop and test the rigorous methods used by Cochrane Review Groups, and a Consumer Network, which provides for input from the lay public, for example input into selection of review questions.

In 2018, CRGs were grouped into eight networks (largely by similarity of topics). Each Network has a Network team comprising of a Senior Editor, Associate Editor, and a Network Support Fellow. The objectives of the Network structure are to support review production and capacity, prioritize topic, foster collaboration, support knowledge translation, and ensure accountability and sustainability of CRGs. CEV is under Cochrane Musculoskeletal, Oral, Skin and Sensory (MOSS) Network.

### **Cochrane Eyes and Vision (CEV)**

CEV was registered as a CRG in 1997. Like Cochrane, CEV is an international network. Members of CEV work together to prepare, maintain, and promote access to systematic reviews of interventions specifically for the treatment or prevention of eye diseases or visual impairment. CEV also conducts systematic reviews of the accuracy of diagnostic tests for common ocular diseases or conditions. Currently, CEV has a main editorial office and two satellites, one in the United States (US) and one in Italy. Each of the CEV units has specific roles.

### **Cochrane Eyes and Vision UK Editorial Base, retired**

The CEV Editorial Base coordinated the process of producing Cochrane Reviews on eyes and vision, from title registration to final publication of protocols and reviews in *The Cochrane Library*. The CEV Editorial Base, initially located at the London School of Hygiene and Tropical Medicine in London, United Kingdom (UK) since 1997 was moved to Queen's University, Belfast, Northern Ireland in April 2021. The CEV Editorial Base has been funded by the UK National Institute for Health Research (NIHR) from 1998 to its closure in March 2023.

The CEV UK Editorial Base was supported by a group of clinical and statistical editors covering all aspects of eye disease and visual impairment. The UK Editorial Base was responsible for ensuring that the protocols and reviews registered by authors are within CEV's scope and that they meet Cochrane's high standards. The UK Editorial Base comprised:

- Three Coordinating Editors, Dr. Gianni Virgili (GV), Dr. John Lawrenson (JL), and Dr. Jennifer Evans (JE), who guided the editorial policy and strategic direction, and acted as the Sign-off Editors on protocols and reviews for publication;
- A Managing Editor, Ms. Anupa Shah, who was responsible for the overall management, organization and day-to-day operations of CEV;
- An Information Specialist, Ms. Iris Gordon, who assisted with identifying the evidence to be included in the systematic reviews by creating and running the electronic searches; and
- Other clinical experts located across the UK served as Contact Editors for CEV.

These responsibilities have been delegated to CEV@US and the Central Editorial Service upon the closure of the CEV UK Editorial Base.

## **Cochrane Eyes and Vision US (CEV@US)**

CEV@US has been funded by a contract with the National Eye Institute (NEI) from 2002 to 2009, a U01 grant from 2009 to 2017, and a UG1 cooperative agreement from 2017-2022. CEV@US was located at Brown University (2002 to 2005), Johns Hopkins Bloomberg School of Public Health (JHSPH), Baltimore, Maryland (2005 to 2019), and has been located at the Department of Ophthalmology, University of Colorado Anschutz Medical Campus since October 1, 2019.

Dr. Kay Dickersin served as the PI of the NEI grant and Director of CEV@US until June 30, 2018. Dr. Tianjing Li became the PI and Director as of July 1, 2018. Dr. Li is also a Coordinating Editor for CEV beginning in 2018. CEV@US employs a Project Director, Methodologists, a Program Coordinator, a Review Production Manager, and several Research Assistants. In addition, Drs. Henry Jampel, Naresh Mandava, Alan Palestine, Barbara Hawkins, Roberta Scherer, and other Co-Investigators assist with assuring high quality systematic reviews, as contacts for reviewers, and as partners in performing methods research.

### **1.2 Goals of CEV@US**

The overall objective of CEV@US is to facilitate the conduct of high quality, regularly updated systematic reviews in both ophthalmology and optometry, and the dissemination of review findings to help providers and patients make evidence-informed decisions.

Under the current cooperative agreement, CEV@US has five specific aims:

- Build a comparative effectiveness research workforce within the field of vision science by educating and training health professionals on key topics;
- Partner with professional societies, academic medical centers, journals, and others to ensure that the knowledge underpinning clinical practice is reliable, available, and applied;
- Prepare systematic reviews addressing prioritized questions, publish the reviews, and regularly update them as new research emerges;
- Conduct foundational methodological research related to systematic reviews; and
- Disseminate the results of our research.

### **1.3 Framework**

CEV@US conducts systematic reviews for publication in *The Cochrane Library*. Topics for reviews are identified based on gaps from previous reviews and from interest and suggestions of experts in the field. Once a review topic has been identified and approved by the CEV Coordinating Editor, the CEV@US team coordinates the review. This coordination includes overall management using Cochrane's Archie and RevMan review management systems; developing the protocol; creating and executing execution of literature searches; screening articles; abstracting and synthesizing data; drafting the manuscript alongside clinical experts; identifying contact editors and potential peer reviewers; managing the editorial and peer review process; and publishing in *The Cochrane Library*.
